CAREER OBJECTIVE

Motivated and detail-oriented Computer Science and Engineering student with strong foundations in Web Development, Database Management, and Machine Learning. Passionate about leveraging full-stack development skills (PHP, MySQL, JavaScript) to build efficient, scalable web applications and contribute effectively to dynamic technology teams.

TECHNICAL SKILLS

Programming & Web: C, PHP, JavaScript, HTML5, CSS3, SQL

Database & Backend: MySQL, API Development, Database Design

Tools & Version Control: Git, GitHub, VS Code, Vercel

Design & UI/UX: Figma, Canva

Productivity: Microsoft Word, Microsoft Excel

Soft Skills: Leadership, Team Collaboration, Problem Solving

PROJECTS

Kajkhuji — Smart Job Discovery Platform · Lead Developer Live Code

A centralized job discovery platform designed to aggregate and filter job opportunities, helping users find relevant roles quickly. Features advanced search filters, responsive UI, and structured database management.

Tech: Next.js · React · TypeScript · Tailwind CSS · shadcn/ui · Lucide Icons . Vercel

LeaveEase — Smart Leave Management System · Full-Stack Developer Live Code

A web application for managing employee leave requests with role-based access, real-time balance tracking, and an approval workflow. Integrated an AI-powered assistant to provide instant help and reduce admin overhead.

Tech: PHP, MySQL, HTML5, CSS3, JavaScript, AJAX

Admission Helper Platform for Bangladeshi Students · Lead Developer Live Code

A full-stack portal that consolidates admission criteria, exam rules, and deadlines across Bangladeshi universities into one place. Designed MySQL schemas and a Figma-based UI to simplify info lookup for prospective students.

Tech: HTML5, CSS3, JavaScript, PHP, MySQL, Figma

Cross-Dataset Generalization Analysis of ML Models · Team Lead (Group CrossLearn)

A university research project evaluating how ML models generalize across different datasets for student performance prediction. Processed disparate datasets to test robustness across demographic and academic groups, and coordinated the team's code reviews and final presentation.

Tech: Python, Machine Learning Algorithms, Data Preprocessing

EDUCATION

B.Sc. in Computer Science & Engineering 2023 – 2027

BGC Trust University Bangladesh, Chittagong

7th Semester (Pursuing) · CGPA: 3.57 / 4.00

TRAINING & CERTIFICATIONS

PHP Intern Developer Training Track — Intransition 2026

- Focused on modern PHP practices, object-oriented programming, database management, and enterprise backend structures.

LEADERSHIP & COMMUNITY INVOLVEMENT

Active Member — BGC Geeks Technical Community

- Participate in technical workshops, skill-building sessions, competitive programming practice, and peer developer discussions.

Team Leader — Team Trash Talk (BGCTUB Central IT Fest 2025)

- Led project formulation, solution design, and pitch presentation for the Idea Contest centered on Smart Waste Management.
